EXPERIENCE

FULL STACK DEVELOPER AT COLEGIO DE SAN JUAN DE LETRAN | FMGSD | 2025

- Independently developed a full-stack web application, together with one partner, to streamline FMGSD's internal operations based on client requirements
- Created modules for handling maintenance requests, asset monitoring, and report generation to support the department's daily workflows
- Built the system from the ground up using HTML, CSS, JavaScript, PHP, and MySQL, ensuring both functionality and usability
- Designed responsive, user-friendly interfaces and implemented complete CRUD functionalities across all key features
- Worked directly with the FMGSD team to gather requirements, iterate on feedback, and deploy the finished system for daily operational use
- Delivered a fully functional, real-world system that addressed specific administrative and facilities management needs within the institution.

FULL STACK DEVELOPER - CALAMBA WATER DISTRICT | 2026

- Designed and developed CWD AquaSense, an AI chatbot-integrated complaint and feedback management system
- Implemented data analytics and sentiment analysis for better understanding of customer concerns
- Automated inquiry handling to streamline customer service processes
- Improved response time and service efficiency
- Generated data-driven reports that provide actionable insights
- Enabled Calamba Water District to enhance operational efficiency and customer satisfaction
